WMSU CIS Platform User Journey Guide

Version 1.0 · November 2026 · Audience: students, faculty, registrar, finance, library, records, inventory, and campus IT

This document is a **step-by-step reference** for signing in and reaching the right screens in each campus system. Use it with the per-system Complete Guides in the same folder for deeper detail.

Contents

1. Universal access (Portal & Identity)
2. Local URLs and platform codes
3. Demo sign-in accounts
4. USiS (Enrollment) — by role
5. UFMS (Finance)
6. TORMS (Records)
7. ULMIS (Library)
8. UIMS (Inventory)
9. DocsTrack (Documents)
10. Portal Admin & MDM
11. Core enrollment-to-registration checklist
12. Troubleshooting quick reference

---

1. Universal access (Portal & Identity)

1.1 Recommended path (SSO)

1. Start the stack: Base API (`3500`), Identity (`3411`), Portal (`5173`), and the app you need (see section 2).
2. Open **WMSU Unified Access Portal**: `http://127.0.0.1:5173`
3. Sign in with your **University Identity** email and password.
4. Complete **MFA** if your account requires it.
5. On the **launcher**, click the platform tile (USiS, UFMS, TORMS, etc.). SSO opens the app in a new tab with your session.
6. Inside the app, menus depend on your **Identity role**, not only the platform tile (see section 1.3).

1.2 Direct URL (per app)

You may open each web client directly (e.g. `http://127.0.0.1:5180/login`). You still authenticate through Identity when dual-auth is enabled.

1.3 Two layers of access

Layer	Who sets it	What it controls
Platform	Portal Admin → user platforms	Launcher tile + ability to SSO into that product (`enrollment` , `finance` , …)
Role	Portal Admin → user roles	Menus and API permissions inside the product (`student` , `registrar` , `cashier` , …)

> Example: `student` role + `enrollment` platform → USiS student portal only. `identity_admin` → broad USiS registrar/faculty menus when enrollment is assigned.

---

2. Local URLs and platform codes

System	Platform code	Web URL (default)	API prefix (Base API)
Unified Access Portal	—	`http://127.0.0.1:5173`	—
Platform Admin (MDM)	—	`http://127.0.0.1:5174`	—
Identity Service	—	via Portal	`http://127.0.0.1:3411/api/v1`
USiS (Enrollment)	`enrollment`	`http://127.0.0.1:5180`	`/api/v1/enrollment`
TORMS (Records)	`records`	`http://127.0.0.1:5181`	`/api/v1/records`
UFMS (Finance)	`finance`	`http://127.0.0.1:5182`	`/api/v1/finance`
ULMIS staff	`library`	`http://127.0.0.1:5183`	`/api/v1/library`
UIMS (Inventory)	`inventory`	`http://127.0.0.1:5184`	`/api/v1/inventory`
DocsTrack (UDMS)	`docstrack` / documents	`http://127.0.0.1:5185`	`/api/v1/documents`
ULMIS OPAC	—	`http://127.0.0.1:5186`	—
ULMIS kiosk	—	`http://127.0.0.1:5187`	—
Base API (all modules)	—	—	`http://127.0.0.1:3500`

If Vite picks another port, read the terminal `Local:` line when starting `pnpm run dev`.

---

3. Demo sign-in accounts

Demo password is usually `ChangeMe123!` (or your `DEMO_SEED_PASSWORD` from Identity seed).

Email	Role (typical)	Use for
`admin@identity.local`	identity_admin	Portal Admin, all platforms, USiS registrar/faculty
`student@identity.local`	student	USiS student portal; linked to seed student `DEMO-2026-001`
`employee@identity.local`	employee	Launcher only unless more roles assigned

Module-local users (e.g. `admin@uims.local`) apply only where that app allows local login — prefer Identity for SSO training.

---

4. USiS (Enrollment) — by role

4.1 Student journey

1. Portal → **Enrollment (USiS)** or `5180/login` as `student@identity.local`.
2. **Dashboard** `/student`
3. **Enrollment** `/student/enrollment` — start/continue term.
4. **Academic advising** `/student/advising` — after faculty endorses, pick one advised course if multiple are offered.
5. **Subject selection** `/student/subjects` — irregular picks / alternates when allowed.
6. **Assessment forms** `/student/assessments` — after registrar assesses.
7. **Payment status** `/student/payments` — pay at UFMS cashier (production).
8. **Enrollment status** `/student/status` — confirm **registered**.
9. **COR** `/student/cor` · **Schedule** `/student/schedule`

4.2 Faculty / adviser journey

1. Sign in with `advising.write` (demo: `admin@identity.local`).
2. **Academic advising** `/faculty/advising` — start or open session.
3. Session `/faculty/advising/{sessionId}`: check advisable courses, pick a **section** per subject, approve underload if needed, **Endorse advising**.
4. **Grade encoding** `/faculty/grades/encode` after classes are registered.

4.3 Registrar journey

1. **Applicants** `/registrar/applicants` — admit (creates student + optional login).
2. **Student records** `/registrar/students` — **Create login** if Portal link missing.
3. **Academic structure** `/registrar/academic` — sections, meetings, **Scheduling desk** (block encode, utilization, roster CSV).
4. **Registration approval** `/registrar/registration` — Assess → Verify payment → Registrar approve → Register.
5. **Enrollments** `/registrar/enrollments` · **Reports** `/registrar/reports`

4.4 Administrative offices (USiS)

Office	Path
Admissions	`/offices/admissions`

Guidance	`/offices/guidance`
Student Affairs (OSA)	`/offices/osa`
Health	`/offices/health`
Scholarship	`/offices/scholarship`

4.5 Demo academic data (Core TOR)

Year `AY2025-26`, block `BSIT-1A`, student `DEMO-2026-001`, sections `IT101-A`, `IT102-A`, `GE101-A`.

---

5. UFMS (Finance)

1. Portal → **Finance** or `http://127.0.0.1:5182` with finance platform + role (`cashier`, finance staff, or `admin@identity.local`).
2. **Dashboard** — budget and collections overview.
3. **Tuition & payment plans** — configure plans (admin).
4. **Cashier / POS** — record payment against USiS assessment number.
5. Return to USiS `/registrar/registration` → **Verify payment**.

Local dev: optional `USIS_DEV_PAYMENT_BYPASS=true` in base-api `.env` (restart API) — not for production.

---

6. TORMS (Records)

1. Portal → **Records** or `http://127.0.0.1:5181` with `records` platform.
2. Staff: transcript requests, certifications, document verification workflows per your role pack.
3. Students: self-service only if role includes student records permissions (usually staff-facing).

---

7. ULMIS (Library)

1. **Staff**: Portal → Library → `http://127.0.0.1:5183` (`library` platform).
2. Cataloging, circulation, acquisitions, member services — menus by library role pack.
3. **Public OPAC**: `http://127.0.0.1:5186` (no staff login).
4. **Kiosk**: `http://127.0.0.1:5187` for self-check / quick patron tasks.

---

8. UIMS (Inventory)

1. Portal → **Inventory** or `http://127.0.0.1:5184` (`inventory` platform).
2. Items & catalog → stock & warehouses → assets → requisitions / counts — Supply Office workflows.

---

9. DocsTrack (Documents)

1. Portal → **Documents** or `http://127.0.0.1:5185`.
2. Create/track documents, routing, approvals, public track link, records lifecycle per role.

---

10. Portal Admin & MDM

1. **Portal Admin** (Identity console from launcher or Identity app): users, roles, platforms, MFA.
2. **MDM Admin** `http://127.0.0.1:5174` — master data / platform ops (separate from day-to-day USiS work).

---

11. Core enrollment-to-registration checklist

Step	Role	Where	Action
1	Registrar	`/registrar/applicants`	Admit applicant
2	Registrar	`/registrar/academic`	Open sections & meetings
3	Faculty	`/faculty/advising`	Section picks + endorse
4	Student	`/student/advising`	Choose advised course if required
5	Registrar	`/registrar/registration`	Assess → pay verify → approve → register
6	Registrar	Scheduling desk	Roster CSV / utilization
7	Student	`/student/cor`	COR & schedule

12. Troubleshooting quick reference

Symptom	Check
Platform tile missing	Portal Admin → assign platform code to user
Wrong menus inside USiS	Identity role (`student` vs `registrar`)
SSO fails	Identity `3411` and Base API `3500` running; sign out and in again
“No student profile linked”	Registrar admit + Identity email match; **Create login** on students
Verify payment fails	UFMS cashier payment, or dev bypass in local `.env`
403 on API	Role lacks permission — expected for students on registrar routes
